

EDUCATION

UNIVERSITY OF CALIFORNIA BERKELEY | BS IN ELECTRICAL ENGINEERING AND COMPUTER SCIENCES

Graduated May 2017 | Berkeley, CA

Graduated with High Honors (Top 10%) • Cum. GPA: 3.85 / 4.0 • Major GPA: 3.84 / 4.0

PUBLICATIONS | STANFORD

Healthcare • Nano-electronics Biosensor • Machine Learning • Artificial Intelligence

- Esfandiyarpour, R., Kashi, A., Nemat-Gorgani, M., Wilhelmy, J., & Davis, R. W. (2019). A nanoelectronics-blood-based diagnostic biomarker for myalgic encephalomyelitis/ chronic fatigue syndrome (ME/CFS). *Proceedings of the National Academy of Sciences*

Bioinformatics • Biology • Systems Biology

- Kashi, A. A., Davis, R. W., & Phair, R. D. (2019). The IDO Metabolic Trap Hypothesis for the Etiology of ME/CFS. *Diagnostics*

WORK EXPERIENCE

STANFORD GENOME TECHNOLOGY CENTER | RESEARCHER

Sep 2017 – Present | Stanford, CA | Advisors: Prof. Ronald W. Davis & Dr. Robert Phair

Python

- Devised the first classifier for myalgic encephalomyelitis (ME/CFS) based on data collected by our sensor and my feature extraction algorithm, published in *PNAS*
- Developed hardware and software for a low-cost impedance measurement device up to 100 kHz
- Optimized the above technologies from inception to a commercially viable product
- Designed an image segmentation algorithm to extract individual cells from SEM images
- Used CNNs to determine the distribution of blood cells for clinical diagnostics
- Manuscript published in *Diagnostics* for the metabolic and genetic origin of ME/CFS

INTEL | SOFTWARE ENGINEER

Jun 2017 – Sep 2017 | Santa Clara, CA

C • ASL

- Improved drivers for I2C and UART interfaces, including touch screens and cameras
- Debugged BIOS ASL code, added features and configuring new peripherals
- Programmed firmware for x86 based R&D devices

ZSPACE | SOFTWARE ENGINEERING RESEARCH INTERN

May 2016 – Aug 2016 | Sunnyvale, CA | Python • C++ • C#

- Utilized deep convolutional neural networks to design a gaze tracking system compatible with polarized 3D glasses
- GPU accelerated using the Theano machine learning framework
- Trained on over 10 GB of data collected from 36 participants on a proprietary data collection application
- Processed and classified images from infrared cameras in real-time

INTEL | UNDERGRADUATE TECHNICAL INTERN - CLIENT R&D

May 2015 – Aug 2015 | Santa Clara, CA

Java • C++ • C

- Architected a MapReduce framework for local big data processing on Android devices
- Parallelized the framework using pthreads in native C/C++ using the Android NDK
- Created an application for my framework by implementing k-means clustering to preprocess data locally before sending the result to the server
- Reduced server storage requirements and average query time

PROJECT EXPERIENCE

FULL-STACK ANDROID DEVELOPMENT

Java • GraphQL • AWS • Python • Elasticsearch • NodeJS

- Created a production-ready, fully-featured Android social media application
- Integrated Android Jetpack libraries for robust presentation and navigation of content
- Designed a back-end, based in AWS, using Amplify, DynamoDB, S3, Lambda, Elasticsearch, Pinpoint, IAM, and Rekognition
- Automated AWS deployments using the Serverless Framework

- Applied best practices using Android architecture components for caching and loading data from the back-end

LOW-COST RELIABLE LOCALIZATION OF DRONE

Python • ROS

- Created a low-cost, alternative to a Vicon Motion capture system to enable indoor aerial delivery via drone
- Reduced the cost by only requiring a standard HD webcam and an array of ARTags
- Connected multiple ARTags to the origin, allowing for rigid body transforms to locate the drone in global coordinates
- Acquired a single-pose estimation with the ROS package `ar_track_alvar` and used MAVROS to communicate with the Pixhawk PX4 2.4.8 flight controller

ARTIFICIAL INTELLIGENCE | VARIOUS TECHNIQUES FOR A PACMAN AI

Python

- Implemented Q-learning, value iteration, policy iteration, and policy extraction to determine which action an agent should take at a given state
- Enacted Bayes nets for predicting the behavior of adversaries conditioned on observations of their actions
- Applied hidden Markov models and particle filtering to determine location of agents when observations are noisy
- Used Minimax with alpha-beta pruning, and A* path finding with consistent heuristics

ANALOG CIRCUIT DESIGN 90 NM PROCESS | SYSTEM ON A CHIP FOR INTERNET OF THINGS

Cadence

- Constructed a 1.2 V bandgap voltage reference that was independent of temperature over the industrial range and voltage from 1.6 V to 3.2 V up to a tolerance of 2 mV
- Engineered a 8-bit 10 kHz SAR ADC with no LSB errors over the full temperature and voltage range
- Developed LDO voltage regulator for analog and digital circuitry
- Designed a 4-bit PGA using a Folded Cascode amplifier with an open-loop gain of 110 DB and unity gain frequency of 6 MHz
- Stabilized the PGA with a phase margin of 10° using miller capacitance

PRESENTATIONS AND POSTERS

- **Kashi, A.** (2019, September). Morphological Classification of RBCs: A Machine Learning Approach. Presented at the Third Annual Working Group Meeting and Community Symposium on the Molecular Basis of ME/CFS, Stanford CA
- **Kashi, A.** and Phair, R. (2018, November). A Search for Common Damaging Mutations in ME/CFS using the SIPS Cohort. Presented at the annual Stanford Genome Technology Center Retreat, Los Altos Hills, CA
- Esfandypour, R., **Kashi A.**, Wilhelmy J., & Davis R. W. A Low-cost, Blood-based Diagnostic for ME/CFS. Poster session presented at: Inflammation, Aging and Chronic Disease; 2017 November 27-28; Stanford, CA.

COURSEWORK

UNDERGRADUATE CS

Introduction to Machine Learning
Operating Systems
Artificial Intelligence
Internet Architecture and Protocols
Computer Security
Efficient Algorithms

UNDERGRADUATE EE

Feedback Control Systems
Analog Integrated Circuits
Introduction to Robotics
Introduction to Embedded Systems
Signals and Systems
Microelectronic Devices and Circuits

CONTINUING EDUCATION

UC BERKELEY

CS 285 Deep Reinforcement Learning

COURSERA

Visual Perception for Self-Driving Cars

PROGRAMMING

Professional Proficiency

Python • Java • Android • C++

High Proficiency

C • GraphQL • AWS • Elasticsearch
Tensorflow • OpenCV • LaTeX

Working Proficiency

Qt • ROS • C# • NodeJS
